MANAGER'S COMMENTARY

In April, fears began to ease in financial markets. Indeed, while investors were focused on concerns around a trade war triggered by the US, the latter adopted a less rigid behaviour during the month and was more open to discussions with its trade partners. Moreover, macroeconomic indicators keep showing solid growth in the US, while Europe continues its recovery and growth in China remains strong as well. Finally, European companies' first quarter earnings releases were good overall even if some difficulties to pass on costs increases and adverse exchange rates effects were mentioned.

Central banks remain accommodating in their speeches showing their patience before proceeding to faster rate hikes. In this environment of strong economic growth (IMF revised upward its forecasts) and investors divesting safe havens, sovereign bond yields increased slightly in the Eurozone (the 10-year OAT moved from 0.72% to 0.79% and the Bund from 0.50% to 0.56%) and the 10-year US government bond is now trading at a yield close to 3%. The strong oil price increase (Brent +7% to 75\$ per barrel) also participated to a rise in inflation forecasts.

Credit market partially benefited from this improvement in the economic sentiment (the Itraxx index declined from 60 bps to 54bps), as well as equity markets (Eurostoxx +4.4%) supported by a favourable change in the €/€ parity (from 1.23 to 1.21).

The fund **Auris Sélection Défensive** registered a small gain of **0.27%** in April.

The fund continues to favour short maturities, especially in the high yield category, or specific securities like floating rate bonds and corporate hybrids. During the month, the fund increased its weight in corporate hybrid bonds by investing in the new issue La Poste 3.125% call 2026 and by strengthening its existing positions (Telefonica 5% and Arkema 4.75%, both with a call in 2020). In the high yield segment, cash received from the bonds redemption by Campofrio was partially used to initiate a new position in Areva 2019. Cash remains at a high level (20% of assets).

The fund has a yield to maturity of 2.1% for a sensitivity which stays low at 1.1. The weighted average rating is still BB+, still one-step below Investment Grade.

Equity exposure represents 3.5% of the portfolio (we added to our positions in Lisi and SQLI).

The fund maintains its conservative positioning, with 44% of assets (including cash) with a maturity of less than one year. Indeed, in the current environment, duration risk appears sometimes poorly remunerated and requires caution. The fund continues to build on thorough bond picking and active management of positions to deliver a steady performance associated with low volatility.

DISCLAIMER. This document is established by Auris Gestion, an asset management company incorporated in Paris under French law. It contains information, opinions and data which Auris Gestion believes to be pertinent and accurate as of the date of their production and taking into account the economic, financial and market environment.
